- Team Collaboration
- Project Ownership

GITHUB METRICS

- 15+ Projects Built
- 1900+ Contributions
- 50+ Problems Solved
- 8.85 CGPA

Harsh Pariya

Aspiring Machine Learning Engineer

B.Tech CSE (2028) · Rai University · CGPA: 8.85/10 · Ahmedabad, India

Open to AI/ML Internships

Aspiring **AI/ML Engineer** pursuing B.Tech in Computer Science with hands-on experience in **Python, Machine Learning, Deep Learning, and Data Preprocessing**. Skilled in **Scikit-Learn, TensorFlow, PyTorch, NumPy, and Pandas** for developing, training, and evaluating machine learning models. Passionate about building intelligent systems, solving real-world problems through AI, and continuously expanding expertise in modern machine learning technologies. Seeking an **AI/ML Internship** to contribute to innovative projects while gaining industry experience in model development and deployment.

EDUCATION

B.Tech — Computer Science & Engineering
Rai University, Ahmedabad · 2024 – 2028

CGPA: 8.85/10

- DSA, Software Engineering, Statistics, Databases
- Active in hackathons, coding contests & AI/ML project building
- Industrial Visit: Adani Power Plant – Exposure to industrial automation systems

KEY ACHIEVEMENTS

Technical Milestones

Development & Problem Solving

- **Active Developer:** 1,900+ GitHub contributions and 15+ diverse technical projects built.
- **Problem Solving:** Solved 50+ data structures & algorithms problems to build core logic.
- **Upskilling:** Completed workshops on AI Tools and Cloud DevOps.

TECHNICAL PROJECTS

SquidAI — Intelligent Assistant Platform

FEATURED PROJECT

Built an AI-powered technical assistant integrating LLM APIs for code generation, debugging assistance, and technical query resolution.

Live DemoGitHub

AI · Full Stack · React · Node

Resume Screening AI

2026

Built an AI-powered Resume Screening System using XGBoost and TF-IDF achieving 88%+ classification accuracy across multiple job categories.

LiveGitHub

Python · XGBoost · TF-IDF · NLP · Streamlit

Fake News Detection NLP

2026

Achieved 99.29% accuracy on 44,000+ news articles using TF-IDF and Linear SVM.

LiveGitHub

Python · SVM · TF-IDF · NLP · Streamlit

California House Price Prediction

2026

Achieved 85.03% R² score using XGBoost and deployed as a full-stack ML application.

LiveGitHub

XGBoost · Next.js · Python · FastAPI · Vercel

Brain Tumor Detection CNN

2026

Deep learning CNN model for MRI brain tumor classification — detecting Glioma, Meningioma, Pituitary & No Tumor with high accuracy.

LiveGitHub

Python · CNN · TensorFlow · Keras · Vercel

Image Caption Generator

2026

VisionCaption AI is a deep-learning application that combines InceptionV3 (CNN) for image feature extraction and an LSTM (RNN) decoder within an overall ANN architecture to instantly generate accurate descriptions for any uploaded photo.

LiveGitHub

Python · TensorFlow · ANN · CNN · RNN · Streamlit

CERTIFICATIONS & WORKSHOPS

AI Tools & ChatGPT Workshop

Be10x · Successfully completed

View on LinkedIn →

Cloud DevOps Roadmap for 2026

GUVI × HCL · Webinar participated

View on LinkedIn →

CORE COMPETENCIES

Machine Learning Foundations

Python, NumPy, Pandas, Scikit-Learn, Regression, Classification, Clustering

Deep Learning

TensorFlow, PyTorch, Neural Networks, CNN Fundamentals & Model Training

Software Development

Building responsive web applications using React, Next.js, APIs and modern development practices

Tools & Deployment

Git, GitHub, Docker, Jupyter Notebook, VS Code and Cloud Fundamentals
